The International Conference Language Technologies for All (LT4All)
Enabling Linguistic Diversity and Multilingualism Worldwide
At UNESCO Headquarters, Paris, France
December 4-6, 2019

Organized by

UNESCO,

Government of the Khanty-Mansi Autonomous Area (UGRA)

The European Language Resources Association (ELRA)

The Special Interest Group on Under-resourced languages (SIGUL)

in partnership with the UNESCO Information for All Programme (IFAP) and Interregional
Library Cooperation Centre.

Organized and supported by:

LT4All was conducted by an Organizing Committee chaired by the Assistant Director-General for Communication and Information of UNESCO, at UNESCO Headquarters, Paris, France. The conference contributed towards the promotion of human rights and fundamental freedoms of all language users to access information and knowledge in languages that are best understood. It also aims to encourage all relevant stakeholders to take measures for the promotion of linguistic diversity, truly multilingual internet and language technologies, with special focus on indigenous languages.

In partnership with:

The conference was organized in 3 days consisting of invited oral presentation, panel discussions, and poster sessions. Oral presentations divided into 10 sessions including

The multilingual landscape and Indigenous Languages
Languages and Communication in the 21st century

Language policies and globalization: challenges and opportunities

Multilingualism in education and research

Innovative applications made possible by Language Technologies

Scientific aspects related to the state of the art in Language Technologies, for spoken, written and sign languages

Infrastructures and resources

Strategies in using Language Technologies for Minority and Indigenous Languages

Activities for language documentation, preservation, reclamation, and enhancement

Scientific aspects related to handling linguistic diversity and multilingualism, particular of under-resourced and indigenous languages

There are 105 papers presented along with 6 different poster sessions, those are Pacific Languages, European and Arctic Languages, Latin America and the Caribbean Languages, African Languages, Asian Languages, North America Languages.

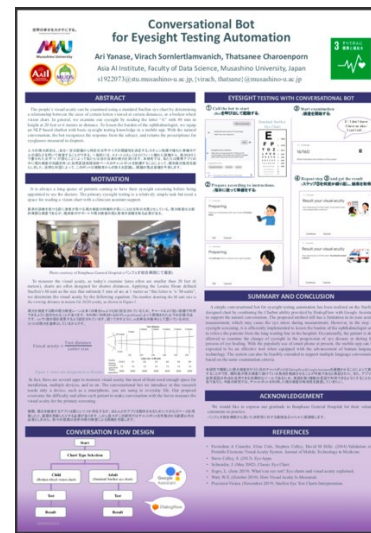

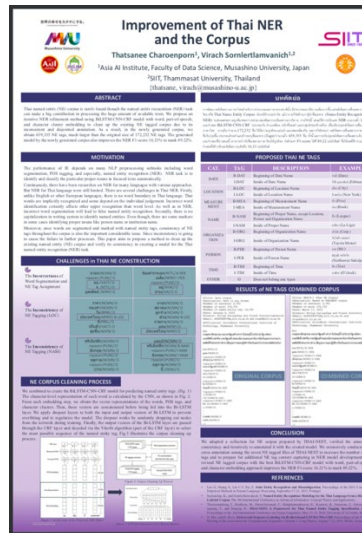

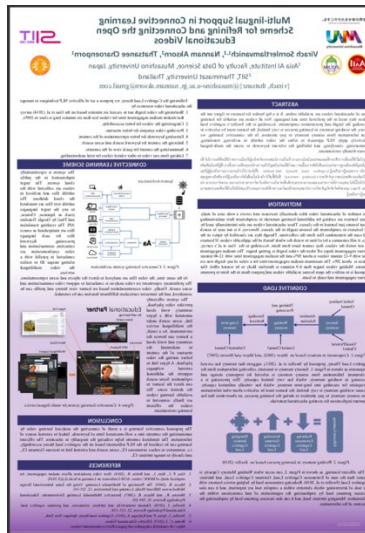

This conference was really an ideal with high impact venue for us to present our research results since it is an international forum, which consists of about 400 researchers, linguists, scientists, technologists, industry representatives and country executives who are experts and leaders in the language technologies, linguistic diversity and multilingual. In addition, the venue, UNESCO headquarter, is also a dream destination for us who are in the line with SDGs.

UNESCO Headquarter, Paris

There were 3 posters selected to present in the session of Asian Language, including “Multi-lingual Support in Connective Learning Scheme for Refining and Connecting the Open Educational Videos”, presented by Virach Sornlertlamvanich, “Improvement of Thai NER and the Corpus”, presented by Thatsanee Charoenporn and “Conversational Bot for Eyesight Testing Automation” presented by Ari Yanase, a student of Department of Data Science. Correspondingly, we were able to closely and deeply discuss on our researches with other participants during our presentation time, and vice versa, we were able to discuss on other posters intensely and introduce our university and research group as well.

During LT4A11, we learned about languages and technologies of all over the world. We experienced the beautiful and noble of French culture and atmosphere even during the demonstration period.

Finally, we would like to thank to Asia AI Institute, Department of Data Science, Faculty of Data Science, Musashino University for giving us the opportunity to attend the LT4A11.
